

# IPB 2.x Bot List

## Version 4.0.0 Final

November 14, 2005 – Written By: cooldude7273

---

### What is a “Bot” or a “Spider”?

Well, your site doesn't end up on search engine sites by magic. They send out robots commonly referred to as “bots” or “spiders” because of how they crawl around the web indexing what they come across. Please note that because a spider comes to your forum it will not appear on the search engine instantly. This list will enable IPB 2.x to identify and track bots that come to your forum!

---

### ChangeLog v4.0.0 Bot List:

- 5 New bot IDs.
  - 150 Dead bots removed!
  - 18 Bot entries beginning with "Mozilla" have been removed due to issues with the list logging members as bots.
  - 27 Updated bots (mostly capitalization errors.)
  - Changed title of list.
- 

### Note:

Currently, IPB groups logs by their ID (whats to the left of the equal sign). For example, if Google bots come to your forums with different ID's, one with “googlebot” and “google”, two different logs will be created despite the fact that they both display the name “Google.com”. The only way this can change is if IPS add the option to group bot logs by display name.

---
